PROCESSING METHOD

WE SPECIALIZE IN DELIVERING HIGH-QUALITY NAME ENGRAVINGS QUICKLY, THANKS TO CONSISTENT PRODUCTION METHODS EMPLOYED IN OUR OWN WORKSHOPS AND CONTRACTED FACTORIES. LET US INTRODUCE THE PROCESSING TECHNOLOGY WE'VE DEVELOPED.

Sandblasting Carving

We achieve finely carved, frosted glass-like engravings on glass products by applying high-pressure sand particles. Each piece is meticulously crafted by skilled artisans, exuding a warm, handmade finish. Additionally, we offer special services such as deep carving and color filling (additional charges may apply).

Inner laser engraving

Using the latest laser processing technology, we engrave characters and logos onto glass by creating a dense cluster of dots within the glass. This technique results in a unique three-dimensional effect, where the engraving seems to float within the glass, adding to its allure.

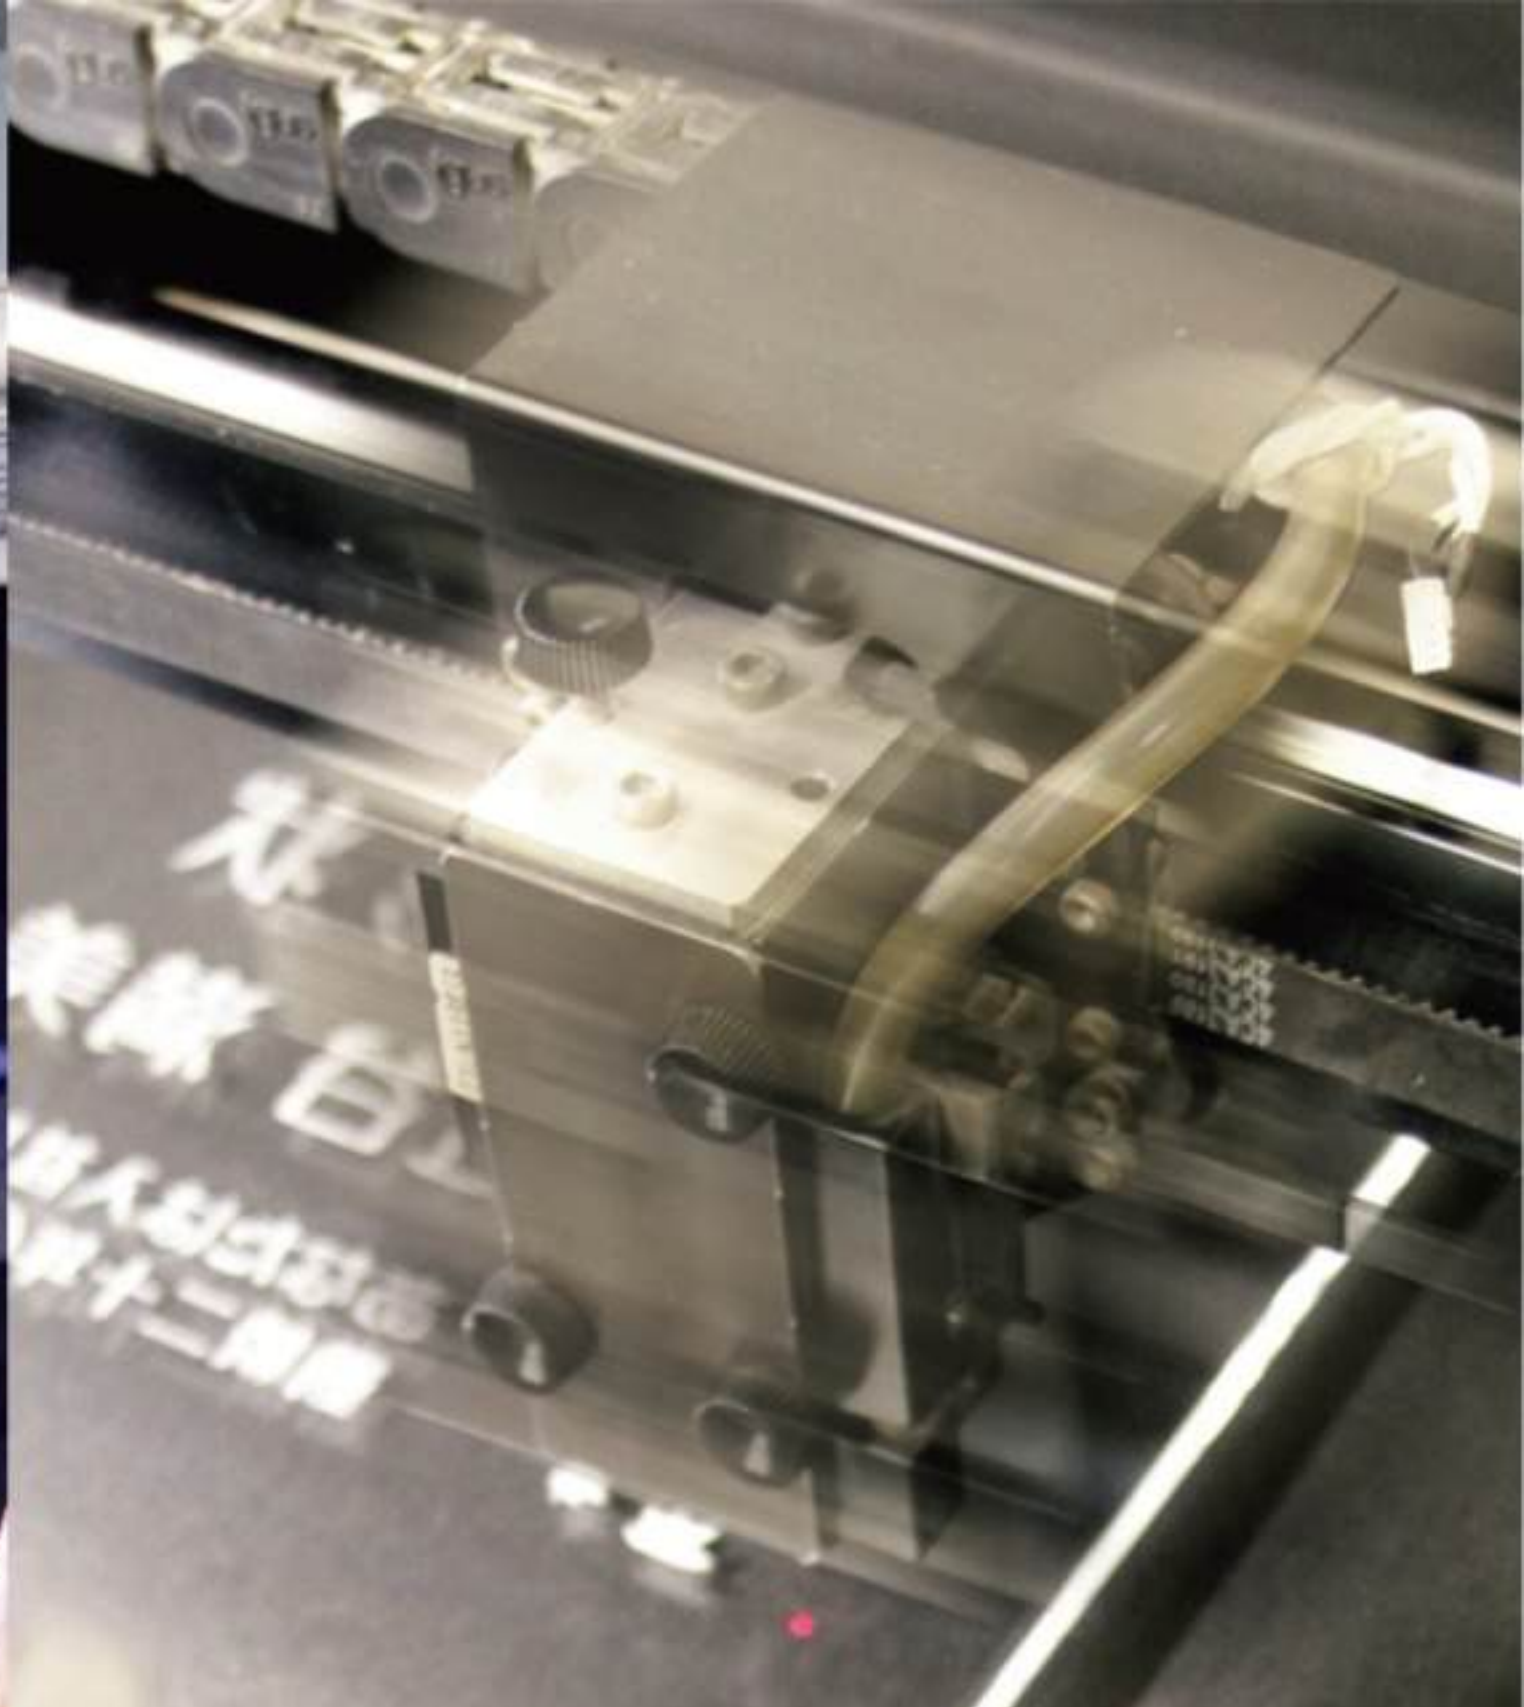

Direct Print

We directly apply UV full-color printing onto the material, enhancing its beauty with vibrant ink colors and transparency.

This process results in vivid hues that beautifully stand out through the material, adding a striking appeal.

Laser Engraving

We utilize laser light to etch text and illustrations onto durable materials like acrylic, wood, bamboo, and metal.

Despite being monochromatic, this method allows for intricate expressions such as gradients and fine-lined shapes, enabling precise and detailed artwork.
